Acta Scientiarum Mathematicarum
Volume 62, Numbers 1-4, 1996

Contents

J. D. FARLEY, Priestley powers of lattices and their congruences. A problem of E. T. Schmidt 3–45

G. CZÉDLI, Four-generated large equivalence lattices 47–69

G. TAKÁCH, Two lattice identities for projective geometries 71–79

B. UHRIN, New lower bounds for the number of lattice points in a difference set 81–99

Y.-G. CHEN, On a problem of P. Erdős 101–114

K. D. MAGILL, JR., The topological nearring on the Euclidean plane which has an identity and is not zero symmetric 115–125

B. ZALAR, Connections between Hilbert triple systems and involutive H^*-triples 127–143

R. ROSSMANITH, J. D. H. SMITH, Alternative approaches to alternative algebras 145–151

Z. NÉMETH, Inequalities of Hardy–Littlewood type for double series ... 153–159

K. IZUCHI, H. TAKAGI, S. WATANABE, Sequential Korovkin type theorems and weighted composition operators 161–174

Y. G. SHI, Generalized Gaussian Kronrod–Turán quadrature formulas . 175–185

Y. KIM, A. SEEGER, A note on pointwise convergence of quasiradial Riesz means 187–199

M. I. GIL', On solvability of nonlinear equations in lattice normed Banach spaces 201–215

M. FELTEN, A smoothness concept for weighted L^p spaces on $[-1,1]$ .. 217–230

M. NEDELJKOV, S. PILIPOVIĆ, Convergence in new generalized function spaces 231–241

V. PROKAJ, Z. SEBESTYÉN, On Friedrichs extensions of operators 243–246

P. MAJOR, A counter-example in ergodic theory 247–258

M. UCHIYAMA, Spectral order, real analytic waves and commutativity of selfadjoint operators 259–269

Contents

O. HADŽIĆ, A theorem on best approximations in paranormed spaces . 271–278

S. SADIQ BASHA, V. VETRIVEL, Common fixed point theorems 279–288

GY. KISS, G. KORCHMÁROS, An upper bound for the number of chords of a polygon which pass through a given point in a finite plane 289–298

K. TAKANO, S. YAMAGUCHI, On a special projective Killing p-form with constant k in a Sasakian manifold 299–317

Z. LIU, Maximal elements, fixed points and completeness 319–324

Book Reviews 325–344

J. DEMETROVICS, L. RÓNYAI, I. G. ROSENBERG, IVAN STOJMENOVIĆ, Clones and maximal sets in set logic containing all Boolean functions 345–357

D. VAGGIONE, $\mathcal{V}$ with factorable congruences and $\mathcal{V} = \Pi^a(\mathcal{V}_{DI})$ imply $\mathcal{V}$ is a discriminator variety 359–368

Y.-G. CHEN, On a paper of Schinzel and Szekeres 369–379

D. P. POMBO JR., A convolution formula for certain Diophantine equations 381–390

P. A. GRILLET, Finite congruences on free commutative semigroups .. 391–405

J. PEČARIĆ, I. PERIĆ, L.-E. PERSSON, A multidimensional integral inequality for monotone functions of several variables 407–412

L. LOSONCZI, ZS. PÁLES, Minkowski's inequality for two variable Gini means 413–425

M. ŞABAC, On Lebesgue's criterion of Riemann integrability 427–432

D. V. GIANG, F. MÓRICZ, The Cesàro operator on the Banach algebra of $L(\mathbb{R}^2)$ multipliers. I (Odd case) 433–456

S. H. KULKARNI, K. C. SIVAKUMAR, Explicit solutions of a special class of linear programming problems in Banach spaces 457–465

J. KRISFÓF, Spectrality in C^*-algebras 467–483

V. PROKAJ, Z. SEBESTYÉN, On extremal positive operator extensions . 485–491

M. BOUCEKKINE, C. K. FONG, Duality in local spectral theory of operators and Nagy's spectral residuum 493–516

B. AUPETIT, E. MAKAI, JR., J. ZEMÁNEK, Strict convexity of the singular value sequences 517–521

M. ITOH, Spectral mapping theorems for p-hyponormal operators 523–535

F. MÓRICZ, The maximal Fejér operator for Fourier transforms of functions in Hardy spaces 537–555

M. BAGOTA, The maximal Riemann operator is bounded from $H^1(\mathrm{T})$ into $L^1(\mathrm{T})$ 557–564

Contents

C. BURNAP, T. B. HOOVER, A. LAMBERT, Von Neumann algebras associated with composition operators 565–582

E. GARCÍA-RÍO, L. VANHECKE, M. ELENA VÁZQUEZ-ABAL, Harmonic connections 583–607

Book Reviews 609–641
